PROJEKTS

Data Science & Machine Learning 🔗

Developed ML models for regression, classification, clustering, and recommendation. Used algorithms such as Ridge Regression, KNN, Matrix Factorization, and SVM. Applied gradient-based optimization and cross-validation. Performed data preprocessing, EDA, and worked with structured/unstructured data, including NLP.

START Hack 🔗

Built a Vue.js prototype at a hackathon to track students' academic performance. Implemented features for monitoring and analyzing grades for educators and parents.

SIL Magazin – Freelance Fashion Magazine App

Developed a cross-platform Flutter app for a freelance fashion magazine. Integrated REST APIs and improved UX with a responsive design.

PROFESSIONAL EXPERIENCE

Data Analyst

Essity

04/2025 – 2026
Munich, Germany

Performed data analysis on real-world datasets using Python, SQL, and Microsoft Excel. Focused on data preprocessing, cleaning, and transformation to ensure data quality. Created visualizations and reports to communicate insights effectively and supported decision-making processes.

Internship-Applied Machine Learning

Technical University of Munich

2024 – 2025
Munich, Germany

I gained hands-on experience with machine learning algorithms, real-world datasets, and Python. I focused on processing and analyzing data to extract insights, improve model performance, and optimize learning techniques. This experience helped me apply machine learning concepts effectively and work with data in a structured way.

EDUCATION

Bsc. in Computer Science

Technical University of Munich

2022 – present
München,
Deutschland

High School Diploma

Dr. Binnaz Ege-Dr. Rıdvan Ege High School
Abitur: 1.4

2016 – 2020
Ankara, Türkei

SKILLS

PyTorch

Python

Java

C++

SQL

Vue.js

Spring Boot

Tensorflow

LANGUAGES

Turkish — Native/Bilingual

English — Fluent

German — Fluent
